ABOUT ME

I am a second-year undergraduate student passionate about Earth Sciences, with a particular focus on natural resources, energy geoscience, and groundwater and hydrology studies. I am fascinated by how Earth systems—from glaciers to ocean currents—have influenced human history and shaped societies over time, and I enjoy exploring the overlap between geoscience and the social sciences.

I am an active public speaker and enjoy breaking down complex ideas for general audiences. Outside academics, I play kabaddi competitively, which has taught me a lot about teamwork and staying focused under pressure.

PROJECTS AND RESEARCH EXPERIENCE

•NeuroHTz

2024-Current

Business Plan and Ethics

IISER Kolkata

- Co-founded NeuroHTz, a neurotechnology startup focused on developing machine-learning-based early detection for neurological disorders like Alzheimer's disease.
- Responsible for designing a feasible business model, identifying target audiences, and ensuring affordability and reach of the product.
- Responsible for maintaining ethical standards in both research and business decisions.
- **Key Achievements:** Secured funding from the MeitY GENESIS EIR program (10 lakh INR), participated in the Inter Institute Entrepreneurship Meet at IISER Tirupati, and was accepted into the first cohort of the IISER Kolkata Incubation Center.
